Semiconductors Development & Sales Group  
Fuji Electronic Device Technology Co., Ltd.

**Notice for Discontinuation of Fuji Z-Trap (Surge Absorber) and its schedule**

Dear Sirs,

We appreciate for your kind and continued patronage for Fuji Electric Semiconductor products.

As we previously notified, we are going to discontinue the Z-Trap surge absorber business.

Now we would like to announce the schedule to the last shipments of those products as described below.

We would appreciate for your kind understandings that our schedule has been changed because the downward-trend of demand for Z-Trap is sharper than our expectation, and the very big increase of cost for raw-materials and the related utility cost, thus it is getting difficult for us to maintain the stable production of them.

We sincerely hope that this decision and schedule will not cause any serious problems on your business but we would like to continue to give better and continuous service to you through other semiconductor products from us.

1) Models to be discontinued : All models of Z-Trap surge absorber

- 2) Background :
- (a) Difficulty of maintaining the stable production due to concerns over long-term material supplies and aging production equipment
  - (b) Cost increase due to the sharp price increase raw material prices and the difficulties to procure the raw material procurement with reasonable price

3) The detailed and updated schedule till the final shipment date

- (a) Designation as "Mature Products" : October, 2007
- (b) Designation as "Obsolete products": October 2008
- (c) Last call of order : End of March, 2009
- (d) Last shipment from our factory: End of September 2009

- 5) Attachment:
- (a) List of maintained / discontinued device models
  - (b) List of similar device from other companies

For more details, please contact to our sales department.

Again, we would like to your kind understanding our situation in this matter.

Sincerely yours,

Fuji Electric Device Technology Co.Ltd.
